Downregulated Pathways – GO BP Treemap

regulation of mitotic cell cycle	regulation of cell cycle phase transitio	cell–substrate adhesion	positive regulation of cell cycle	negative regulation of cell cycle proces		egative regulation cell cycle phase
skeletal system development	chromosome segregation	regulation of chromosome organization	protein–DNA complex assembly	cell cycle checkpoint signaling		regulation of chromosome segregation
	negative regulation of cell cycle	positive regulation of cell cycle proces	negative regulation of mitotic sister ch	regulation of sister chromatid segregati	nucleosome assembly	metaphase/anaphase transition of mitotic
mitotic cell cycle phase transition	regulation of mitotic cell cycle phase t	protein–DNA complex organization	regulation of mitotic nuclear division	chromosome separation	regulation o mitotic siste chromatid s	r regulation
			nucleosome organization	regulation of chromosome separation	negative regulation of mitotic metaphase	negative regulation of sister chromatid
